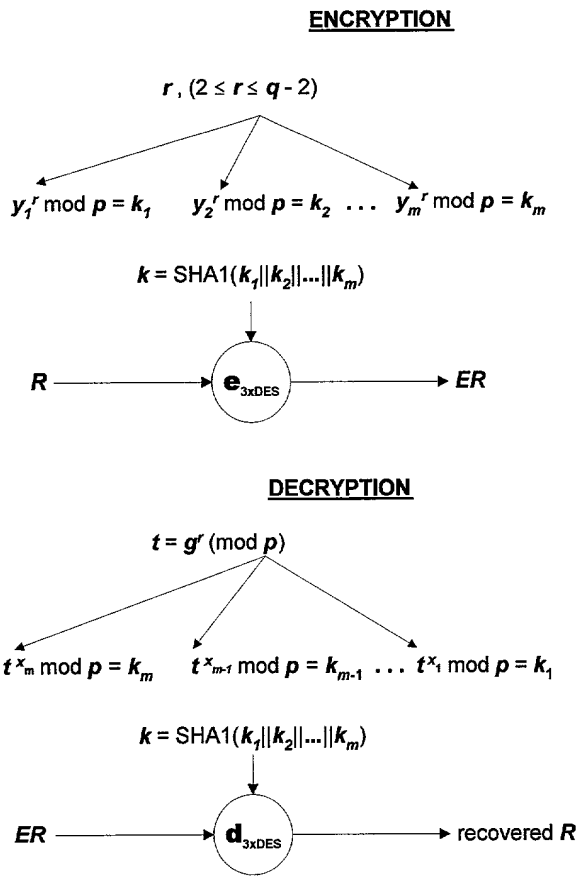
FIG. 2

Diffie-Hellman Random Value Encryption and Decryption



Legend:

p	Diffie-Hellman prime modulus
q	Diffie-Hellman 160-bit prime
g	generator of group Z_p
m	number of labels
k_i	i^{th} derived key
k	two-key 3xDES key
r	Ephemeral Private Key
R	Random Value
ER	Encrypted Random Value
t	Ephemeral Public Key

FIG. 3

ANSI X9.69 Combiner Function

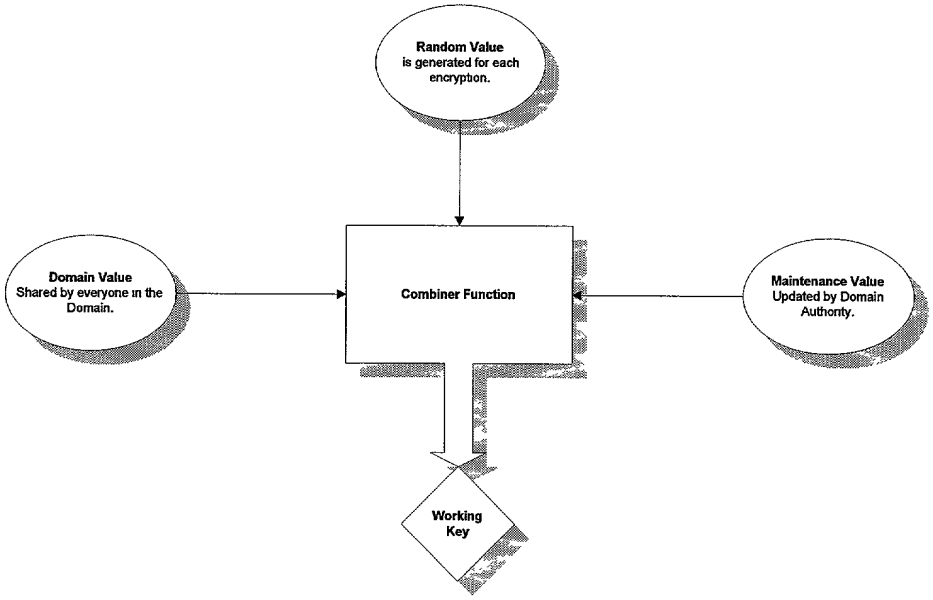


FIG. 4

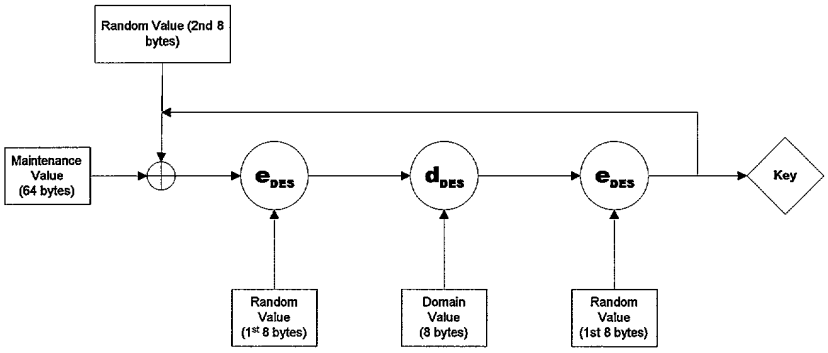
ANSI X9.69 Combiner Function Using X9.52 (Triple DES CBC Mode)



Legend

e_{DES} DES encryption
d_{DES} DES decryption
$\oplus$ Exclusive-OR

FIG. 5

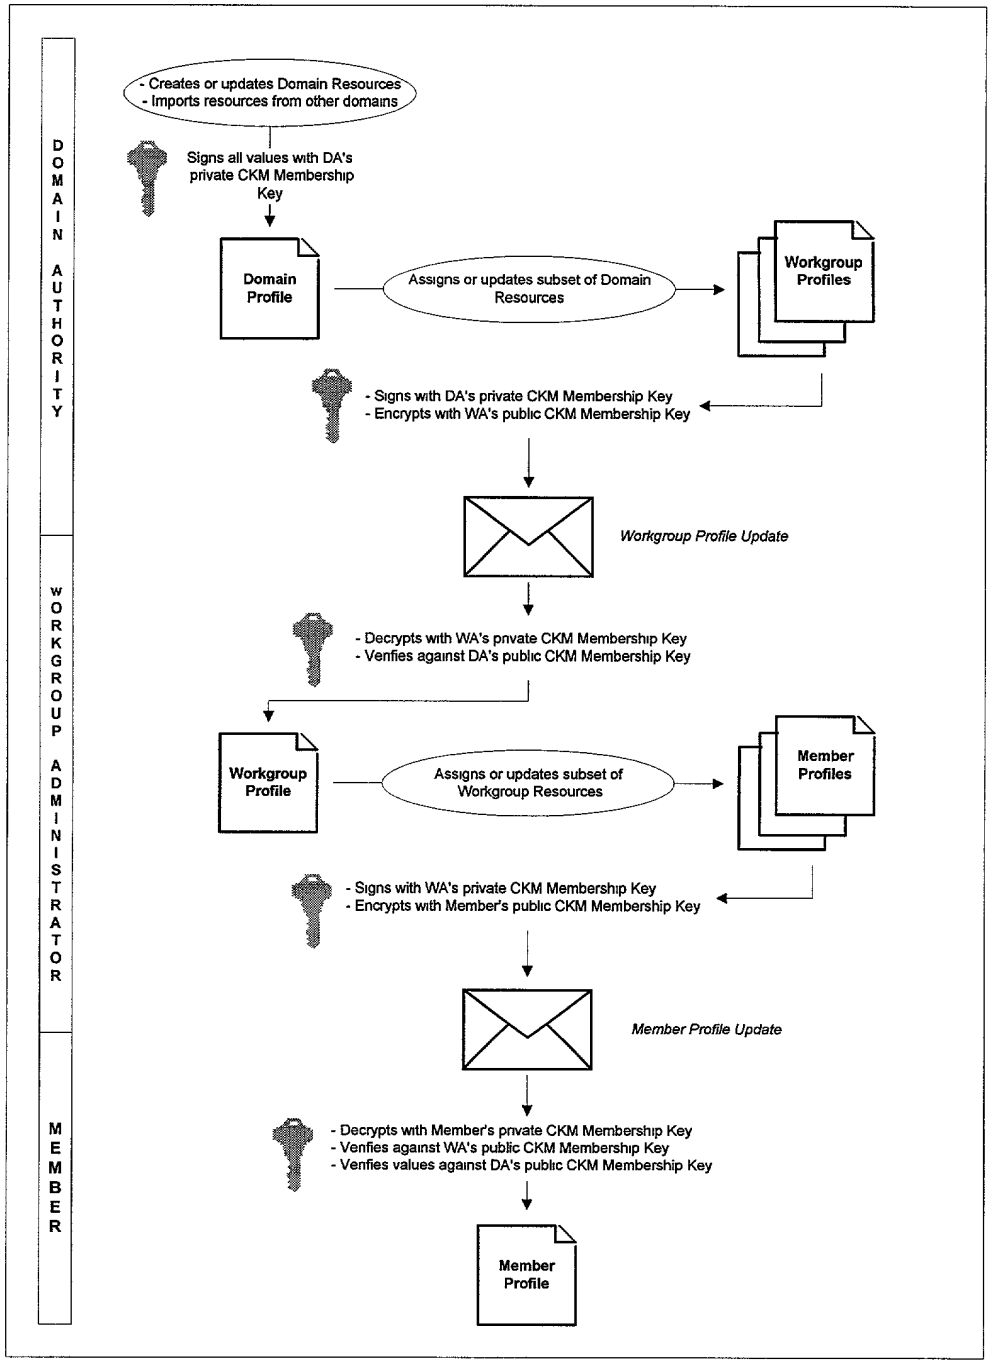
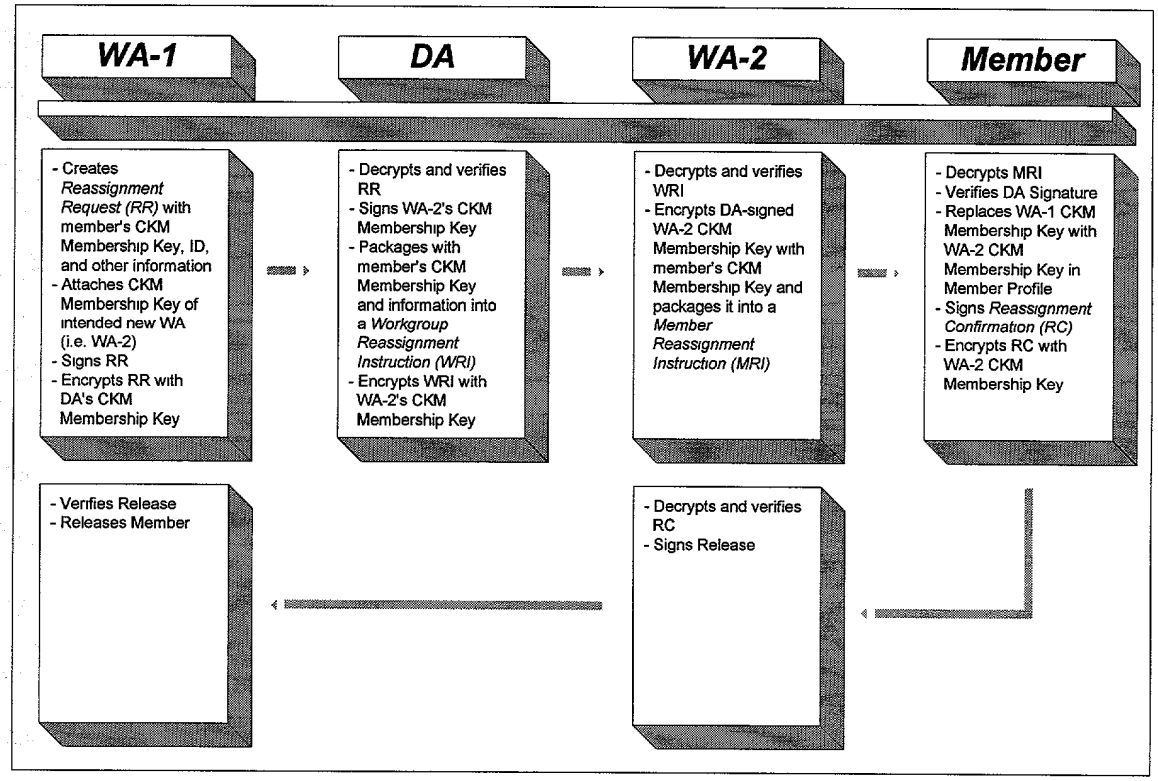
- WA ID
- WA Address
Member
Step 6
- Generates CKM Membership Key Pair and retains private key
- Retains DA's & WA's public CKM Membership Key

FIG. 20



DOMAIN AUTHORITY
WORKGROUP ADMINISTRATOR
MEMBER
- Creates or updates Domain Resources
- Imports resources from other domains
Signs all values with DA's private CKM Membership Key
Domain Profile
Assigns or updates subset of Domain Resources
Workgroup Profiles
- Signs with DA's private CKM Membership Key
- Encrypts with WA's public CKM Membership Key
Workgroup Profile Update
- Decrypts with WA's private CKM Membership Key
- Verifies against DA's public CKM Membership Key
Workgroup Profile
Assigns or updates subset of Workgroup Resources
Member Profiles
- Signs with WA's private CKM Membership Key
- Encrypts with Member's public CKM Membership Key
Member Profile Update
- Decrypts with Member's private CKM Membership Key
- Verifies against WA's public CKM Membership Key
- Verifies values against DA's public CKM Membership Key
Member Profile

FIG. 21



WA-1
DA
WA-2
Member
- Creates *Reassignment Request (RR)* with member's CKM Membership Key, ID, and other information
- Attaches CKM Membership Key of intended new WA (i.e. WA-2)
- Signs RR
- Encrypts RR with DA's CKM Membership Key
- Decrypts and verifies RR
- Signs WA-2's CKM Membership Key
- Packages with member's CKM Membership Key and information into a *Workgroup Reassignment Instruction (WRI)*
- Encrypts WRI with WA-2's CKM Membership Key
- Decrypts and verifies WRI
- Encrypts DA-signed WA-2 CKM Membership Key with member's CKM Membership Key and packages it into a *Member Reassignment Instruction (MRI)*
- Decrypts MRI
- Verifies DA Signature
- Replaces WA-1 CKM Membership Key with WA-2 CKM Membership Key in Member Profile
- Signs *Reassignment Confirmation (RC)*
- Encrypts RC with WA-2 CKM Membership Key
- Decrypts and verifies RC
- Signs Release
- Verifies Release
- Releases Member
